

Sokeri-Jussin Kievari

SAFETY INFORMATION

The ventilation system in Sokeri-Jussin Kievari has been modified so that the exhaust air is not recirculated back indoors. Heat recovery is not used.

We have installed Genano air purifiers at all our restaurant premises. Genano's patented system is based on electronic filtering and it will clean the indoor air even of nanosize particles such as microbes and viruses.
More information at genano.com.

You can wash your hands in the toilets. Hand sanitizer is available in several places around the restaurant.

The tables are disinfected after each party.

Your waiters will serve you from a safe distance. They will not pour the beverages. They will not speak when coming near to your party.

When moving around in the restaurant, please remember to observe safe distances. Children are allowed in the restaurant area only in the company of an adult. Routes are marked with red arrows and signs.

There may be only one person, or the members of the same party, in the toilet at one time.

Your waiter will help you in all the questions related to safety.

**Thank you for your cooperation.
The safety of our customers and staff is our highest priority!**
